

What one Meta ad can **actually** carry.

The limits, and two catches.

Text

Up to

5

primary texts

5

headlines

5

descriptions

Meta rotates them and learns.

Media

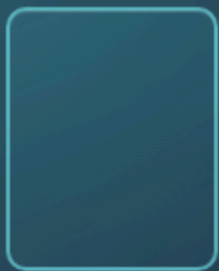

Up to

10 images

10 videos

5 calls to action

Shapes, **one ad**

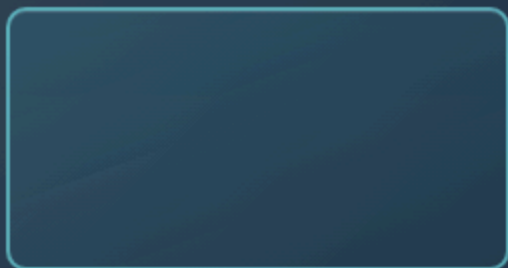

Feed

4:5 or 1:1

Stories and Reels

9:16

Landscape

1.91:1

Placement asset customisation serves each placement its own file.

Catch 1

Multiple texts and placement-specific files can't share one creative. Meta refuses it ("Multiple bodies assets cannot be applied to rule no. 1"). Split it: one ad per text, each keeping every shape.

Catch 2

I supplied a 1:1 next to a 4:5. It uploaded fine and was never served. I only found out by reading the creative back from Meta.

**Always read back
what you built.**
